WHO I AM

How I work. What I believe. What I deliver.

I FOCUS ON WHAT MATTERS

I **align technology** with business objectives, focusing on solutions that generate real value and long-term impact.

I SOLVE COMPLEX CHALLENGES

I enjoy **understanding problems** in depth, analyzing every detail and designing practical, effective solutions.

I IMPROVE EVERY DAY

I am **constantly learning, evolving** and looking for better ways to work, automate processes and optimize environments.

I WORK AS PART OF A TEAM

I value **collaboration, communication** and trust. I believe the best results are achieved when we work together.

I TAKE OWNERSHIP

I'm **committed, responsible** and **accountable**. I take ownership of my work and see every challenge through to completion.

I CARE ABOUT QUALITY

I pay **attention to details**, follow best practices and strive to deliver reliable, secure and scalable solutions.

PROFESSIONAL VALUES

CONTINUOUS LEARNING

Always exploring new technologies, best practices and innovative solutions.

PROBLEM SOLVING

Focused on identifying root causes and delivering practical, long-term solutions.

AUTOMATION

Improving efficiency by automating repetitive processes and optimizing workflows.

SECURITY

Committed to designing secure infrastructures following modern cybersecurity principles.

TEAMWORK

Building strong relationships through collaboration, communication and shared goals.

“

PERSONAL MOTTO

*Reliable technology is not built by chance—
it is built through knowledge, planning and continuous improvement.*

”

PROFESSIONAL JOURNEY

From Technical Support to Enterprise Infrastructure & Cloud Engineering

MY EVOLUTION

A continuous path of growth, learning and responsibility, building solid expertise in IT infrastructure, cloud technologies and cybersecurity.

ENTERPRISE INFRASTRUCTURE

Design, deployment and optimization of secure and reliable IT environments.

MICROSOFT CLOUD

Microsoft Azure, Microsoft 365, Entra ID and Intune administration.

VIRTUALIZATION

VMware, Hyper-V and Proxmox management to maximize performance and availability.

SECURITY

Implementing security policies, Zero Trust, MFA, SSL management and resilient backups.

AUTOMATION

PowerShell automation, scripting and process optimization to improve efficiency.

CONTINUOUS LEARNING

Hands-on lab, Microsoft Learn and a constant DevOps and technologies evolution.

16+ YEARS

Of IT Experience

300+ USERS

Supported in Enterprise Environments

150+ VIRTUAL MACHINES

Managed Across Multiple Platforms

ENTERPRISE FOCUSED

Infrastructure, Cloud and Security

A JOURNEY OF GROWTH, LEARNING AND IMPACT

2009

IT SUPPORT TECHNICIAN IPASME

Started my professional career providing technical support and user assistance in a healthcare environment.

2016

TECHNICAL SUPPORT ENGINEER TELEFÓNICA ESPAÑA

Expanded my expertise in enterprise technical support, networking and corporate IT infrastructure.

2019

SYSTEM ADMINISTRATOR ARAMARK ESPAÑA

Managed IT infrastructure, Windows servers, Microsoft 365 environments and virtualization platforms.

2023

SENIOR IT SYSTEMS ADMINISTRATOR CMR GROUP

Leading enterprise infrastructure and cloud solutions. Focused on security, automation, business continuity and IT process optimization.

16+ YEARS

Of IT Experience

4 COMPANIES

In My Professional Journey

300+ USERS

ENTERPRISE PROJECTS

Real implementations that demonstrate my experience in enterprise infrastructure, cloud technologies and business continuity.

★ FEATURED PROJECT

ENTERPRISE RANSOMWARE RECOVERY & INFRASTRUCTURE REDESIGN

? WHAT PROBLEM DID I SOLVE?

Restore business continuity after a ransomware attack that completely compromised the virtual infrastructure.

The attack encrypted and deleted both the primary backups and the backup replicas, leaving the organization without a valid recovery point and no dedicated cybersecurity team.

According to senior management estimates, every day of downtime represented an approximate business impact of **€700,000**.

⚙️ HOW DID I SOLVE IT?

- Led the technical investigation.
- Recovered deleted backup files using specialized recovery software.
- 50/50 collaboration with Dell engineers for the decryption process.
- Coordinated the recovery of more than 150 virtual machines.
- Restored production services in only **2 weeks**.
- Achieved **zero data loss**.

POST-RECOVERY: INFRASTRUCTURE REDESIGN

- ✓ Implemented immutable offline backups.
- ✓ Implemented multi-copy backup strategy.
- ✓ Implemented off-site backup replication.
- ✓ Defined and applied a structured patch management policy.
- ✓ Redesigned infrastructure following Zero Trust principles.

🔧 TECHNOLOGIES USED

VMware vSphere	Fortinet
Veeam Backup & Replication	Microsoft Defender
Immutable Backups	PowerShell
File Recovery Tools / Basic Forensics	Active Directory
Dell Enterprise Support	Group Policy (GPO)

📈 BUSINESS IMPACT

150+
Virtual Machines Restored

Zero
Data Loss

2 Weeks
Full Recovery

New Ransomware-Resistant Backup Strategy

Infrastructure Redesigned with Zero Trust Principles

01

MICROSOFT 365 MIGRATION

🔧 CHALLENGE

Migrate users and services from on-premises environment to Microsoft 365 without disrupting business operations.

⚙️ IMPLEMENTATION

- Planned and executed the migration.
- Migrated users from on-premises to M365.
- Managed identity synchronization.
- Validated Exchange Online services.
- Provided post-migration support.

📈 BUSINESS IMPACT

Successful migration with minimal downtime and improved collaboration.

02

MICROSOFT INTUNE AUTOMATIC ENROLLMENT

🔧 CHALLENGE

Standardize endpoint deployment while reducing manual configuration.

⚙️ IMPLEMENTATION

- Designed automatic enrollment into Intune.
- Configured enrollment based on computer naming conventions.
- Automated endpoint provisioning.
- Simplified device onboarding.

📈 BUSINESS IMPACT

Faster deployment and consistent endpoint management.

03

ENTERPRISE BACKUP & RANSOMWARE PROTECTION

🔧 CHALLENGE

Protect critical business data against hardware failures, accidental deletion and ransomware attacks.

⚙️ IMPLEMENTATION

- Designed backup schedules.
- Configured immutable backups.
- Replicated backups to Azure Storage.
- Performed validation and recovery tests.

📈 BUSINESS IMPACT

Increased business resilience and ransomware protection while ensuring rapid data recovery.

04

WINDOWS SERVER DEPLOYMENT

🔧 CHALLENGE

Deploy production and testing servers for multiple enterprise projects.

⚙️ IMPLEMENTATION

- Installed Windows Server.
- Configured AD integration.
- Configured IIS services.
- Installed SSL certificates.
- Hardened server configurations.
- Prepared environments for workloads.

📈 BUSINESS IMPACT

Stable, secure and standardized server deployments.

05

SSL CERTIFICATE LIFECYCLE MANAGEMENT

🔧 CHALLENGE

Maintain secure encrypted communications across enterprise services.

⚙️ IMPLEMENTATION

- Purchased SSL certificates.
- Managed certificate renewals.
- Installed certificates on IIS, RDP and services.
- Validated secure communications.
- Prevented downtime caused by expired certificates.

📈 BUSINESS IMPACT

Secure enterprise services with uninterrupted encrypted communications.

06

GROUP POLICY ADMINISTRATION

🔧 CHALLENGE

Standardize Windows environments while improving security and administrative control.

⚙️ IMPLEMENTATION

- Created Group Policies for:
 - USB port restrictions
 - Corporate wallpapers
 - Security settings
 - Windows configuration
 - Administrative controls

📈 BUSINESS IMPACT

Consistent security policies and standardized workstation configuration.

07

MICROSOFT ENTRA ID ADMINISTRATION

🔧 CHALLENGE

Maintain secure cloud identities and access management for enterprise users.

⚙️ IMPLEMENTATION

- Managed Microsoft Entra ID.
- Administered users and groups.
- Managed identity synchronization.
- Supported cloud authentication services.
- Assisted with identity governance.

📈 BUSINESS IMPACT

Reliable identity management and secure access to Microsoft cloud services.

08

MULTI-FACTOR AUTHENTICATION (MFA)

🔧 CHALLENGE

Strengthen user authentication and reduce the risk of compromised accounts.

⚙️ IMPLEMENTATION

- Enabled MFA for corporate users.
- Assisted users during enrollment.
- Verified secure authentication processes.
- Supported security best practices.

📈 BUSINESS IMPACT

Improved identity security and reduced the risk of unauthorized access.

300

Backup & recovery with replication

ENTERPRISE INFRASTRUCTURE

High-level architecture of the enterprise environment showing the end-to-end flow of services, platforms and connectivity.

SECURE

End-to-end security with Fortinet, VPN and best practices.

HIGH AVAILABILITY

Redundant infrastructure and clustering to ensure business continuity.

SCALABLE

Built to grow with the business and adapt to new needs.

RELIABLE

Backups, monitoring and disaster recovery to keep services always available.

USER-CENTRIC

Secure, simple and efficient access to tools and information.

DEVICE DIVERSE

Support for multiple devices and platforms across the organization.

MODERN WORKPLACE MANAGEMENT

Secure. Productive. Connected.

Managing Microsoft cloud services to empower people and protect what matters.

WHAT PROBLEM DO I SOLVE?

Companies require secure digital workplaces that allow employees to collaborate efficiently while protecting corporate identities, devices and data.

HOW DO I SOLVE IT?

I manage Microsoft cloud services, identity, endpoint security and collaboration platforms to provide a secure, modern and productive working environment.

TECHNOLOGIES I USE

- Microsoft Azure
- Microsoft Intune
- Microsoft Entra ID
- Microsoft Defender
- Microsoft 365
- Exchange Online
- SharePoint Online
- Teams
- Multi-Factor Authentication
- Conditional Access

Azure Portal

Microsoft Azure

Search resources, services, and docs

Azure services

- Virtual machines
- App Services
- Storage accounts
- SQL databases
- Azure Databricks
- PostgreSQL
- Azure Active Directory

Resources

Recent	Favorite	Last Viewed
rg-production	Resource group	2 hours ago
vm-app-01	Virtual machine	3 hours ago
storage-lsp001	Storage account	5 hours ago
sql-prod-01	SQL database	1 day ago
app-web-prod	App Service	2 days ago

I manage Azure resources, virtual machines, storage, networking, identity and security to build scalable and secure cloud solutions.

MICROSOFT 365 ADMIN CENTER

Microsoft 365 admin center

Home

Search users, groups, settings or tasks

Essentials

- Users: Add or manage users
- Billing: Total balance: €10.00
- Office apps: Install and manage Office apps
- Domains: Manage your domains

Microsoft 365 apps

- Outlook
- Word
- Excel
- PowerPoint
- SharePoint
- OneDrive
- Exchange

I administer Microsoft 365 services including Exchange Online, Teams, SharePoint, OneDrive and Office apps.

MICROSOFT ENTRA ID

Microsoft Entra admin center

Overview

Search your tenant

Basic information

Name	Contoso
Tenant ID	a1b2c3d4-e5f6-1234-5678-90abcde1234
Primary domain	contoso.com
License	Microsoft Entra ID P2
Users	1,248
Groups	256
Applications	87
Devices	1,756

I manage identities, users, groups, applications and access policies to ensure secure access to company resources.

MICROSOFT INTUNE

Microsoft Intune admin center

Devices | Overview

Enrolled devices	Compliance	Noncompliant
1,245 Total	98% Compliant	25 Devices

Platform

Windows	58%
iOS/iPadOS	24%
Android	12%
macOS	6%

Device configuration profile status

Succeeded	152
Error	12
Conflict	3
Pending	8

I implement and automate endpoint management, device enrollment, policies, compliance and application deployment.

MICROSOFT DEFENDER FOR ENDPOINT

Microsoft Defender

Security overview

Secure score	Active incidents	Devices at risk	Device compliance
78%	2	5	96%
+5% improvement	High severity	Needs attention	Compliant

Recent incidents

Suspicious PowerShell activity	High	Active
Credential theft attempt	Medium	Investigating
PJA-Win32/Toolbar	Low	Resolved

I configure and monitor endpoint protection, threat detection, vulnerabilities and attack response.

MICROSOFT TEAMS & SHAREPOINT

Microsoft Teams admin center | SharePoint admin center

Dashboard

Overview

Users	Teams	Channels	Meetings
1,180	342	1,860	23,548
+8% last 30 days	+4% last 30 days	+1% last 30 days	+6% last 30 days

Active sites

Active sites	Storage used
1,248	2.45 TB
+3% last 30 days	+8% last 30 days

Most active sites

- Intranet: Contoso.sharepoint.com/sites/intranet
- Projects: Contoso.sharepoint.com/sites/projects
- HR: Contoso.sharepoint.com/sites/hr

I manage collaboration platforms that improve productivity and secure document management.

IDENTITY SECURITY

Secure access with MFA, Conditional Access and Zero Trust principles.

DEVICE MANAGEMENT

Manage and secure devices across Windows, iOS, Android and macOS.

COLLABORATION

Empower teams with Microsoft Teams, SharePoint and OneDrive.

DATA PROTECTION

Protect corporate data with Microsoft Defender and security policies.

CLOUD OPTIMIZATION

Optimize cloud resources and control costs while improving performance.

ENTERPRISE VIRTUALIZATION

High availability. Maximum efficiency. Business continuity.

Building and managing virtual infrastructures that deliver performance, reliability and scalability.

WHAT PROBLEM DO I SOLVE?

Modern organizations require highly available virtual infrastructures capable of maximizing hardware resources while ensuring business continuity.

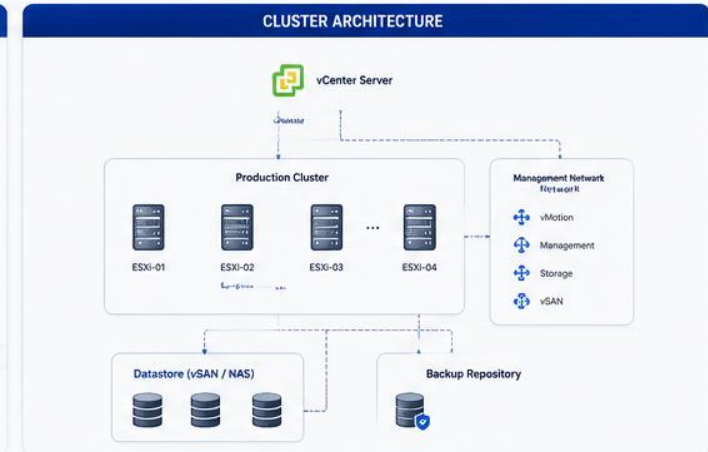

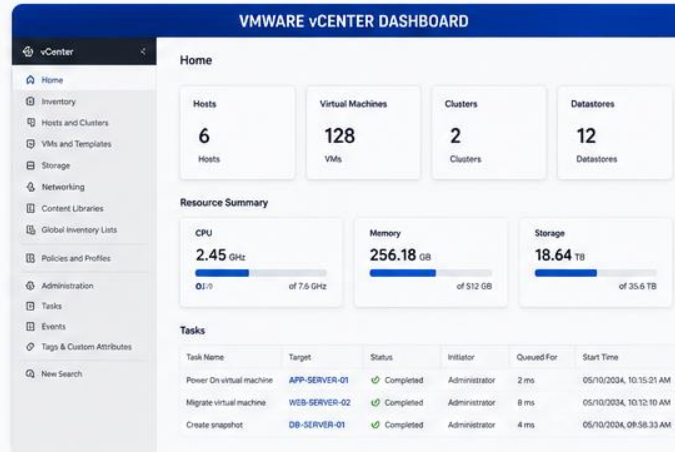

HOW DO I SOLVE IT?

I deploy, manage and optimize virtualization platforms that improve scalability, simplify administration and increase infrastructure reliability.

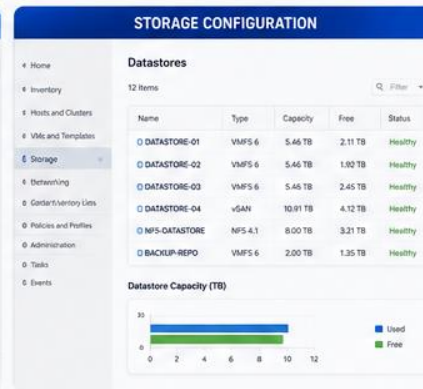

TECHNOLOGIES I USE

- VMware vSphere
- Hyper-V
- vCenter
- High Availability (HA)
- Clusters
- Storage
- Virtual Machines
- Snapshots

Name	State	Status	Host	IP Address
DC-01	Powered On	Normal	ESXi-01	10.10.10.10
APP-SERVER-01	Powered On	Normal	ESXi-02	10.10.10.21
WEB-SERVER-02	Powered On	Normal	ESXi-03	10.10.10.22
DB-SERVER-01	Powered On	Normal	ESXi-01	10.10.10.30
FILE-SERVER-01	Powered On	Normal	ESXi-04	10.10.10.40
BACKUP-SERVER	Powered On	Normal	ESXi-02	10.10.10.50
WIN10-CLONE-01	Powered Off	Normal	ESXi-03	-
TEST-VM-01	Powered Off	Normal	ESXi-04	-

Policy	Host failures cluster tolerates
Failures to tolerate	1

HIGH AVAILABILITY

Minimize downtime with HA, vMotion and automated failover.

RESOURCE OPTIMIZATION

Maximize hardware utilization and reduce operational costs.

BUSINESS CONTINUITY

Snapshots, backups and replication ensure data protection.

SCALABILITY

Easily scale infrastructure to support business growth.

CENTRALIZED MANAGEMENT

vCenter simplifies monitoring, administration and automation.

INNOVATION LAB (HOMELAB)

Learn. Experiment. Build. Improve.

A personal enterprise-grade homelab to experiment with, test and master technologies before applying them in real-world environments.

HARDWARE

- Lenovo Neo 50Q (Mini PC)
Intel i7 • 16GB RAM • 512GB NVMe
- TerraMaster D5-310 (NAS)
5 Bay • 4 x 8TB HDD
- Network Switch 2.5GbE
- APC UPS

WHAT PROBLEM DO I SOLVE?

Continuous learning is essential in IT. Before implementing new technologies in production, they should be tested, documented and fully understood.

HOW DO I SOLVE IT?

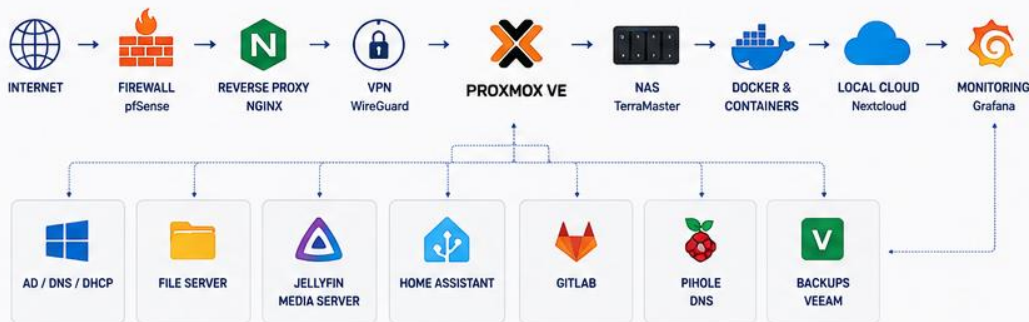

I built and maintain a personal enterprise-grade homelab where I experiment with infrastructure, networking, virtualization, automation and cybersecurity technologies in real-world scenarios.

TECHNOLOGIES I USE

- Proxmox VE
- Reverse Proxy
- VPN
- Firewall
- NAS
- Docker
- Containers
- Monitoring
- Local Cloud
- Internal Networking

HOMELAB NETWORK ARCHITECTURE

WHAT I LEARN & TEST

- ✓ New technologies and features
- ✓ Infrastructure and network design
- ✓ Automation and scripting
- ✓ Security and best practices
- ✓ High availability and backups
- ✓ Performance and monitoring
- ✓ Real-world problem solving

HOW I DOCUMENT

- ✓ Architecture diagrams
- ✓ Step-by-step guides
- ✓ Configurations and scripts
- ✓ Lessons learned / Notes
- ✓ Documentation in Notion & GitHub

RACK LAYOUT

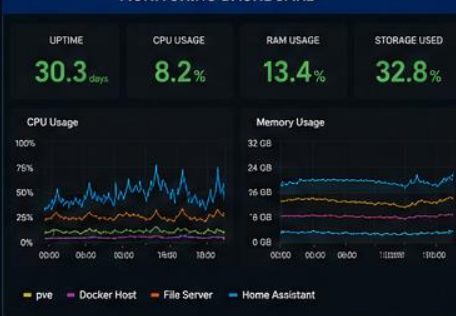

PROXMOX VE DASHBOARD

CONTAINERS & SERVICES

Name	Status	CPU	Memory
nginx-proxy-manager	running	0.6%	120MB
nextcloud	running	1.2%	512MB
homeassistant	running	1.1%	650MB
pihole	running	0.3%	90MB
portainer	running	0.4%	64MB
watchtower	running	0.2%	35MB
jellyfin	running	1.5%	256MB
grafana	running	0.4%	80MB
prometheus	running	0.3%	90MB

MONITORING DASHBOARD

SERVICES ARCHITECTURE (OVERVIEW)

Reverse Proxy
Secure access and
SSL termination

VPN
Remote secure
connectivity

Virtualization
Proxmox VE for VMs
and containers

Storage
NAS for data and
backups

Containers
Docker containers for
self-hosted services

Local Cloud
Nextcloud for file sync
and collaboration

Monitoring
Grafana & Prometheus
for observability

LAB BENEFITS

- ✓ Learn by doing with real technologies
- ✓ Test safely in an isolated environment
- ✓ Improve skills and stay up to date
- ✓ Document and share knowledge
- ✓ Innovate and solve real-world problems

AUTOMATION & PROCESS OPTIMIZATION

Automate. Standardize. Optimize. Deliver value.

I automate repetitive IT tasks to improve efficiency, reduce errors and free up time for high-value activities.

WHAT PROBLEM DO I SOLVE?

Manual and repetitive administrative tasks consume valuable time and increase the risk of human error.

HOW DO I SOLVE IT?

I automate repetitive IT processes using scripting and standardized procedures to improve operational efficiency, consistency and system reliability.

TECHNOLOGIES I USE

- PowerShell
- Windows Administration
- Task Scheduler
- Microsoft 365
- Active Directory
- Automation Scripts

POWERSHELL SCRIPT EXAMPLE

```
1 # Create new users from CSV
2 Import-Csv -Path "C:\Scripts\newusers.csv" | ForEach-Object {
3     $username = $_.SamAccountName
4     $password = ConvertTo-SecureString $_.Password -AsPlainText -Force
5     New-ADUser -Name $_.Name -GivenName $_.FirstName -Surname $_.LastName `
6         -SamAccountName $username `
7         -UserPrincipalName "$username@company.com" `
8         -AccountPassword $password `
9         -Enabled $true `
10        -Path "OU=Users,DC=company,DC=com"
11    Add-ADGroupMember -Identity "Employees" -Members $username
12    Write-Host "User $username created successfully." -ForegroundColor Green
13 }
14 Write-Host "Process completed." -ForegroundColor Cyan
```

Automating user creation saves time, ensures consistency and reduces errors.

BEFORE vs AFTER

BEFORE (MANUAL PROCESS)

- Export users from Excel
- Create user manually in Active Directory
- Add user to groups manually
- Configure mailbox manually in Microsoft 365
- Verify and document manually

High time consumption
High risk of human error

AFTER (AUTOMATED PROCESS)

- Import data (CSV)
- Automated user creation with PowerShell
- Add to groups automatically
- Automated mailbox creation in Microsoft 365
- Automated report and logging

Time saving
Accurate & consistent

AUTOMATION WORKFLOW

Consistency
Standardized processes

Efficiency
Execute tasks in seconds

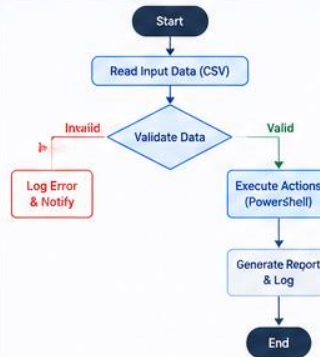

Reliability
Minimize errors and rework

Scalability
Easily repeatable and extensible

PROCESS FLOWCHART EXAMPLE

AUTOMATION IN ACTION – EXAMPLES

User Provisioning
Automated creation of AD users, groups and mailboxes from CSV.

Account Management
Disable inactive accounts and generate activity reports.

System Maintenance
Automated cleanup of logs, temp files and system health checks.

Email Notifications
Send automated reports and alerts to IT teams.

KEY BENEFITS

- Save valuable time
- Reduce human errors
- Improve consistency
- Increase productivity
- Better audit & compliance
- Reliable and repeatable processes

Automation is not just about writing scripts, it's about creating solutions that drive efficiency and deliver value.

PowerShell is my automation engine.
Standards and documentation are my fuel.

Automate today,
optimize tomorrow.

CERTIFICATIONS & CONTINUOUS LEARNING

Learn. Grow. Apply. Deliver.

Technology evolves constantly, making continuous learning essential to deliver modern, secure and efficient IT solutions.

LEARN

Acquire knowledge every day

PRACTICE

Build in labs and real environments

APPLY

Solve real problems and create value

GROW

Evolve with technology and new challenges

COMPUTER ENGINEERING DEGREE

Hago Saber:

Aldrys Leonardo García Reaño

Simulac de la C.B.N. N° 16/021-013, expediente al Título de Ingeniero; cumplido con todos los requisitos exigidos por las leyes para obtenerlo, por lo que, en su nombre, se le otorga el Título de:

Ingeniero en Informática

Se hace constar en este Título en la Dirección de Central de Estudios y Exámenes y en la Dirección de la Biblioteca de la Universidad de Tecnología del Oeste, Moriscal, Sucre, Venezuela, a los efectos de que el interesado pueda acreditarlo en los casos que correspondan, a los efectos de que el interesado pueda acreditarlo en los casos que correspondan, a los efectos de que el interesado pueda acreditarlo en los casos que correspondan.

DEGREE OFFICIALLY RECOGNIZED IN SPAIN

De conformidad con lo dispuesto en el Real Decreto 967/2014, de 21 de noviembre, por el que se establecen los requisitos y el procedimiento para la homologación y declaración de equivalencia a titulación y nivel académico universitario oficial y para la convalidación de estudios extranjeros de educación superior, esta Dirección General ha resuelto que el título universitario oficial obtenido en Venezuela que se detalla a continuación, queda homologado al título universitario oficial español que se indica.

TÍTULO EXTRANJERO: Ingeniero en Informática
INSTITUCIÓN QUE LO EXPIDE: Instituto Universitario de Tecnología del Centro Alberto Adriani

TÍTULO ESPAÑOL HOMOLOGADO: Ingeniero en Informática

Madrid, 17 de Junio de 2016

LA SUBDIRECTORA GENERAL
M^a del Valle Pérez Balshedeo
